

# MANAGED FIREWALL FACT SHEET

Network security is an essential requirement for any medium sized business. One of the crucial components of network security is protection of your network at the network borders, guarding against internet based threats, viruses and spam. Bendigo Telco's managed firewall product suite offers a range of firewall products utilising the latest in Next Generation Firewall (NGFW) technology, combined with Bendigo Telco's specialist knowledge of internet and data security.

## CHOICE OF FIREWALL

### Why Fortinet?

Bendigo Telco offers firewalling solutions from Fortinet, industry leaders in NGFWs. Fortinet protects some of the world's largest data networks, utilising the latest technologies to develop their solutions. There is no better choice when it comes to protecting your business.

## SECURITY EXPERTISE

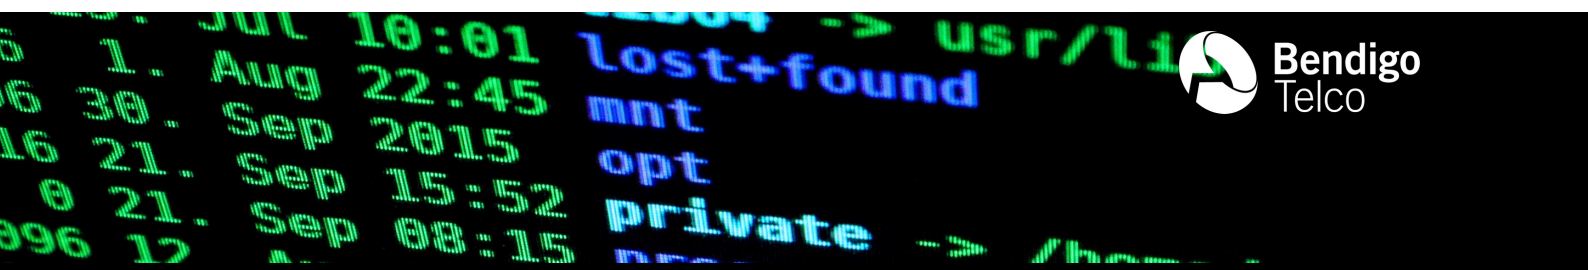

### Specialist network knowledge

Bendigo Telco prides itself on delivering the best advice when it comes to data security. Our highly qualified engineers are fully trained in Fortinet Network Security. We work with you to develop the right firewall configurations to protect and enable your business.

## Technical Benefits

### You won't want any less than this;

- ACL (Access Control List), Port Blocking, Port Forwarding and NAT (Network Address Translation)
- Web based interface – See the status and configuration of your firewall
- Deep Packet Inspection
- DMZ ( Demilitarized Zone)
- High availability architecture results in improved network and application uptime
- Reporting – View reports such as top traffic, top applications and top sites
- Secure Socket Layer Virtual Private Network (SSL VPN)
- URL Filtering
- Included business hours support (Optional 24/7 support)
- Optional Firewall management
